

南タイのマングローブ湿地で1982年に記録されたカニ類

Brachyuran species recorded from mangrove swamp in southern Thailand in 1982

和田恵次

Keiji Wada

はじめに

タイの沿岸性カニ類の報告は、古くはRathbun (1909, 1910)が知られている。南タイの西岸域では、プーケットの沿岸を中心に種リストもある (Lundoer, 1974; Sèrene & Soh, 1976; Komai *et al.*, 1995; Ng & Davie, 2002)。また近年では、個々の種の新記録あるいは新種報告が様々な分類群について、タイの沿岸域から報じられている (Ng *et al.*, 2002; Davie, 2003; Allen *et al.*, 2011; Davie *et al.*, 2013)。

筆者は、1982年11~12月に南タイのラノーン、プーケットの沿岸域のマングローブ湿地を中心にカニ類の生態学的研究を実施する機会を得た。本報告はその折に採集されたカニ類の種リストである。

調査地は表1の通りである。採集された標本はすべて大阪市立自然史博物館 (OMNH) に登録しており、各種ごとに登録番号、標本個体数、採集地、採集年月日を記載した。また日本に分布する種には、和名を学名とともに併記した。

Oziidae イソオウギガニ科

Epixanthus corrosus A. Milne Edwards, 1873 シワセビロガニ

OMNH-Ar-10512: 5, Loc. 3, Dec. 20, 1982
